ICC-ES ESR# 2413 verifies that “SELECT” is code-compliant.

DecTec SELECT, manufactured by Skyline Building Systems, Inc., received an evaluation report (ESR-2413) from ICC Evaluation Service (ICC-ES), providing evidence that the 60 mil Walkable Deck and Flat Roof Single-Ply Membrane, meets code requirements. Building officials, architects, contractors, specifiers, designers and others utilize the ICC-ES Evaluation Reports to provide a basis for using or approving SELECT in construction projects following the International Building Code.

ICC-ES President Mark Johnson explains why ICC-ES Evaluation Reports are so important. “Skyline Building Systems can now reference the evaluation report to ensure building officials, and the building industry, that the product meets I-Code requirements,” Johnson said. “Building departments have a long history of using evaluation reports, and ICC-ES operates as a technical resource for the building department. Final approval of building products is always in the hands of the local regulatory agency.”

ICC-ES thoroughly examined Skyline Building Systems product information, test reports, calculations, quality control methods and other factors to ensure the product is code compliant. ICC-ES Reports are seen as critical to Skyline, says Business Development Manager, Grant Lawton, *“Our niche Products are not widely known or understood throughout North America, an ICC-ES provides reassurance to everyone from Architects and Construction Professionals to Building Departments, that the Product has undergone stringent evaluation to ensure Code-Compliance by an organization well known and respected for its impartiality and technical expertise. Having this report removes the “fuzziness” that often exists with Standards and individual test reports, and alleviates the burden on all professionals involved, to decipher and make judgement calls as to the Products suitability. Hands down, an ICC-ES Report puts us head and shoulders above our Competition.”*

About ICC

ICC-ES is the United States’ leading source of technical information on building products and building technology for code compliance. A nonprofit, public-benefit corporation, ICC-ES performs technical evaluations of building products, components, methods and materials. The evaluation process culminates with the issuance of reports on compliance with the major U.S. building codes, which are available at www.icc-es.org.

ICC-ES is a subsidiary of the International Code Council, a membership association dedicated to building safety and fire prevention that develops the codes used to construct residential and commercial buildings, including homes and schools. Most U.S. cities, counties and states that adopt codes choose the International Codes developed by the International Code Council.

About Skyline

Through our DecTec Brand of membranes, Skyline provides proven waterproofing and roofing solutions for balcony and roof-deck applications. As North America's leading innovator in pedestrian traffic bearing PVC membranes, our products provide a proven, low maintenance and low life-cycle cost solution with over 40 years of real-life roofing manufacturing behind each and every one of them. DecTec commercial-grade membranes, coupled with industry leading system accessories and components, make water intrusion problems on deck areas a thing of the past.
